

## UPCOMING COURSES AT SPARTAN CONTROLS – EDMONTON

### **Course S140: Farris Safety Relief Valve Maintenance**

- ❖ *This 2-day course uses lectures and examples to explain the correct procedure for Farris Valve maintenance.*

**Date: April 4-5, 2011**

**Price: \$ 650.00**

### **Course 7009: DeltaV Implementation 1**

- ❖ *This 4.5 day course covers a complete DeltaV system implementation.*

**Date: April 11-15, 2011**

**Price: \$ 3,770.00**

### **Course 1200: ROC Engineering I**

- ❖ *This 4-day course provides an overall working knowledge of the ROC 300 series (ROC 312 and ROC 364) and an overview of FCD products. Students are presented with a comprehensive view of the hardware and software in the ROC family and then are taught how to completely configure a working unit.*

**Date: April 18-21, 2011**

**Price: \$ 2,830.00**

### **Course 2072: Fundamentals of CSI 2130**

- ❖ *This 2-day hands-on course focuses on the basic operation of the CSI 2130 Machinery Health Analyzer. Students will collect data on machines similar to those found in plants. This course is designed for students with little or no experience with CSI analyzers, but who are experienced in the field of vibration data collection and analysis. If you also need to learn analysis skills, we recommend taking the Basic Vibration Analysis course.*

**Date: April 25-26, 2011**

**Price: \$ 1,440.00**

### **Course 2091: Advanced CSI 2130 with PeakVue**

- ❖ *This 2-day course is derived from the standard 3-day Advanced CSI 2130 with PeakVue course. This course is intended for personnel with single-channel vibration analysis experience and little or no multi-channel experience. This class covers advanced signal processing using Emerson's patented PeakVue technology for slow-speed analysis, coherence and cross-channel phase, operating deflection shapes (ODS), modal analysis, and other advanced techniques*

**Date: April 27-28, 2011**

**Price: \$ 1,440.00**

**Note: If attending both course #2091 & #2072 a 15% discount will be applied to the cost of both course**

### **Course 7017: DeltaV Implementation II**

- ❖ *This 4-1/2 day course is for process control engineers responsible for configuring the DeltaV system. Advanced topics will be covered including display scripting, function blocks, and configuration tips.*

**Date: April 25-29, 2011**

**Price: \$ 3,770.00**

Courses qualify as professional development credit for APEGGA or ASET. For more course information or to register on-line, please visit our website at [www.spartancontrols.com](http://www.spartancontrols.com).
